

Making the Cut!

freud®

Diablo Construction Series

Freud Tools... Precisely What You Need!

A leader in the woodworking industry for over 50 years, Freud supplies quality power tools and accessories to suit any project.

Industrial Series Saw Blades

Features a red Perma-SHIELD® coating, which helps to reduce friction, heat build-up and gummying and adds to a longer blade life. Every Freud blade is laser-cut, computer balanced and tensioned in order to achieve perfection.

Diablo Construction Series Saw Blades

Specially designed to meet the needs of the construction and remodeling market, Diablo blades have a thin kerf, making them ideal for portable and low powered saws both on, or off the job site.

Router Bit Set

Includes a variety of bits that allow you to experience several router functions.

Cuts all composition materials, plywoods, hardwoods, and softwoods.

Use on hand-held and table-mounted portable routers.

Forstner Bits

These bits will not burn like standard bits and will stay sharp many times longer. Extra-hardened carbide bits will drill through a multitude of materials such as plywood, hard & softwoods, melamine and MDF. Perfect for drilling pocket holes, angled holes, overlapping holes when used in hand-held drills and drill presses.

Router Bits

Serious woodworkers choose serious accessories. They choose Freud. All bits feature a kick-back reducing shoulder design and a shear angle that lets the bit slice through the wood smoothly, producing superior finish-ready cuts every time.

Tool Cleaners and Lubricants

DriCote Blade & Bit Cutting Lubricant

For cleaner truer cuts of wood, laminates and metals. Reduces resin build-up

TopCote Table & Tool Surface Sealant

- Reduces sliding friction & hang ups
- Repels dirt, dust & moisture

Bearing Lubricant

- Extended bearing life
- Withstands extreme loads & heat
- Frees frozen bearings
- Dries quickly
- Protects up to 288°C

Flyte Blade & Bit Cleaner

Removes resin, pitch, gum and grim from saw blades, power bits and planer knives. 600 ml

Tools of the Trade!

Exchange-A-Blade • Easy as 1, 2, 3!

How it works...

These blades are engineered from the finest materials. When you exchange your dull blade for a reconditioned one, you are getting back a sharpened, cleaned, balanced blade with the carbide tips ground to razor sharpness or replaced if need be. You'll find these Exchange-A-Blade saw blades equal in performance to any new blade, guaranteed.

1. Buy It

Start by choosing the right blade for the job from over 103 saw blades using the easy-to-read saw blade selector.

2. Use It

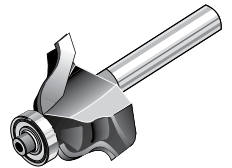

You'll find a picture on each blade label indicating the material for which the blade is best suited. The professional and Industrial Carbide blades are hard bodied and surface ground. C2 and C4 tips are used to provide the ultimate combination of durability and precision cutting.

3. Bring It Back

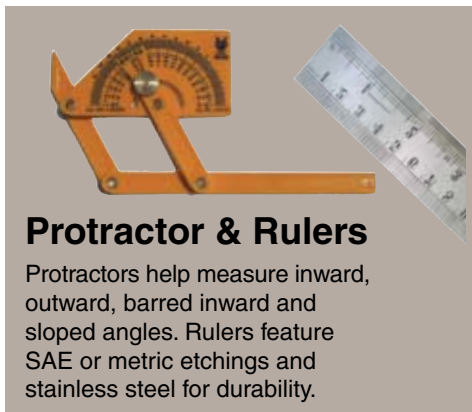

When your Exchange-A-Blade™ is worn and dull, simply bring it back to your local Windsor Plywood and exchange it for a new blade. sometimes saving up to 75% off the original price.

Includes Router Bits too!

The Exchange-A-Bit program provides for over 85 industrial quality router bits in assorted styles and sizes.

- Excellent for general purpose work through to fine cabinet detailing.
- Router bits are available in 1/4" and 1/2" shanks.
- Made of the finest Tungsten carbide to provide long life.

Protractor & Rulers

Protractors help measure inward, outward, barred inward and sloped angles. Rulers feature SAE or metric etchings and stainless steel for durability.

Wood Clamps

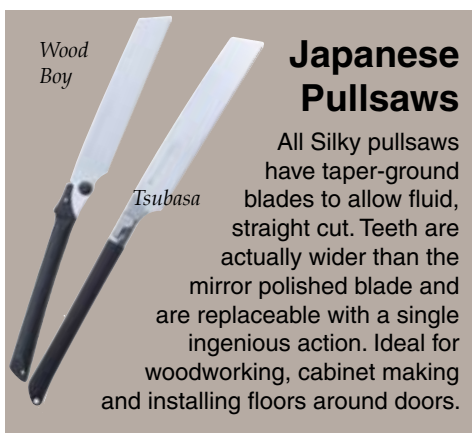

Clamps are a must have for woodworkers and home do-it-yourselfers. Features sliding bar grip, cast iron jaws, steel screw hardwood handles and quick release.

6" Electronic Digital Caliper

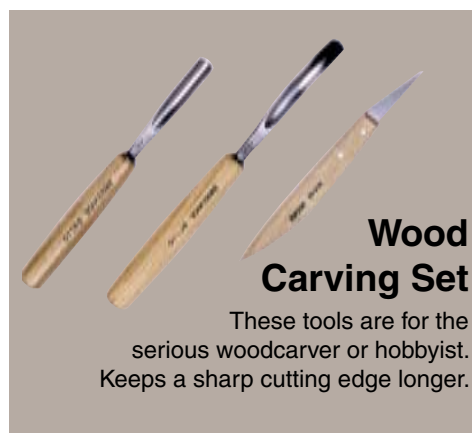

- 6" x 0.0005" / 150 mm x 0.01 mm
- Stainless steel
- Thumb wheel adjustment
- Depth gauge
- Comes with case and extra battery

Measure Twice, Cut Once!

Japanese Pullsaws

All Silky pullsaws have taper-ground blades to allow fluid, straight cut. Teeth are actually wider than the mirror polished blade and are replaceable with a single ingenious action. Ideal for woodworking, cabinet making and installing floors around doors.

Wood Carving Set

These tools are for the serious woodcarver or hobbyist. Keeps a sharp cutting edge longer.

3 Piece Carbide Router Bit Set

- Cabinet Door Set, 1/2" Shank
- 3/8" ogee rail and stile 2 pc set
