

Windsor Plywood's WHY ARE OUR PRE-HUNG INTERIOR DOORS BETTER?

- We use solid wood jambs for greater stability (not MDF or Particle Core)
- We use three 3 1/2" x 3 1/2" hinges to hold the door firmly in place
- We custom hang each door for your swing requirements, preventing unsightly full hinge exposure
- Stops are also solid wood in full length position vs. undercutting for carpet
- Custom hanging also assures the door crown matches the jamb assuring a tighter fitting door

We can hang all your doors into the exact jambs that you want; as well as cut down or size all doors to your requirements.

DON'T TEAR OUT THAT OLD JAMB!

Save Yourself Some Unnecessary Expense...

Just like our exterior entrance door program, if your door jamb is in good condition, why change it? We will machine your new door to match your existing jamb (Mortise hinges & drill holes for locksets)
