FUSIONE STONE

'Hooked for Life' Accro pour la vie'

DO IT YOURSELF MASONRY Faîtes-le vous-même

"Hooked for Life"

Fusion Stone provides innovative thin-stone
Systems that are easily installed on both new and
existing wall assemblies. The patented Fusion Stone
Systems use stainless steel components for a lifetime
of maintenance-free performance that may be installed
in any weather, by anyone.

"Traditional" Fusion Stone incorporates the use of mortar, while "Dry-Stack" Fusion Stone utilizes a mortar-free technology. Shouldice Designer Stone has been providing quality products for over 65 years and your satisfaction is our guarantee.

Please visit us at www.fusionstone.ca to see how you can become "Hooked for Life".

The Shouldice Family

Accro pour la vie

Fusion Stone fournit des systèmes innovant en pierre-mince de qui peuvent être facilement installés sur les types de murs existants ou nouveaux. Les systèmes brevetée de la Fusion Stone utilisent les composants en acier inoxydable pour une vie performance sans entretien, qui peuvent être installés à n'importe quel temps, par n'importe quel personne.

« Tradionnelles » Fusion Stone intègre l'utilisation de mortier, tandis que « Dry-Stack » Fusion Stone utilise une technologie qui est sans mortier. Shouldice Designer Stone a été fournir des produits de qualité depuis plus de 65 ans et votre satisfaction est notre garantie.

Visitez notre site web au www.fusionstone.ca pour voir comment vous pouvez devenir « Accro pour la vie ».

Lifetime Guarantee

Fusion Stone is the best investment for your project and we back that up with a Lifetime Guarantee.

Garantie à vie

Fusion Stone est appuyer d'une garantie à vie et sera le meilleur investissement pour votre projet.

Easy to install

You just screw it to the wall and it's "Hooked for Life". A few basic tools and your average home handy man is a Fusion Stone Expert producing a professional looking project.

Facile à installer

Quelques outils de base et votre maison moyenne bricoleur devient une Fusion Stone experts, produisant un professionnel projet.

Mortar Free Technology

Makes Dry-Stack that much easier and with the same great moisture control preventing the growth of mold.

Aucun Poz-E-Flo, Aucun Mortier

La système Dry-Stack est tellement plus facile, toujours avec le même contrôle d'humidité qui empêche la croissance des moisissures.

Stainless Steel Hardware

Starter Strips, Clips and Screws are all high quality Stainless Steel. When we say "Hooked for Life" we mean it! Clips, Screws and Drivers are included.

Quincaillerie en acier inoxydable

Les ancrages, les bandes de départ et les vis sont tous en acier inoxydable de haute qualité. Quand nous disons : « Accro pour la vie », sa veut tout dire! Rallonge avec tête inclus.

Replace Existing Siding

Whether you're replacing all of your siding or just adding accents, Fusion Stone is the easiest way to upgrade your home. Use the Fusion Sill as a transition and it couldn't be easier.

Remplacer le revêtement extérieur existant

Si vous voulez remplacer le revêtement extérieur de votre maison, le simple ajout d'accents Fusion Stone est la façon la plus simple pour ajouter une valeur sûr à votre résidence. Il suffit d'utiliser les allèges Rock Stone comme transition, rien de plus facile!

"Hooked for Life"

THAT IS
"LEED GREEN FRIENDLY"

Shouldice Designer Stone manufacturers Stone Products that support the principles of LEED with raw materials, production, life cycle costing and performance. The benefits of additional durability, design and economic efficiency are an integral component in every piece of Shouldice Designer Stone.

What is LEED?

Leadership in Energy and Environmental Design (LEED) is a rating system devised by the United States Green Building Council (USGBC) to evaluate the energy & environmental performance of buildings and encourage market transformation to sustainable design. Detailed information on the LEED program is available at www.usgbc.org where the program outlines the intent, strategies, requirements and technologies required. Information on LEED Canada is available from the Canada Green Building Council at www.cagbc.org

What is the Goal of LEED?

LEED's overall goals are to improve occupant well-being, environmental impacts and economic returns of new buildings.

LEED Certification Points

The Stone Products of Shouldice are governed by LEED NC that provides a checklist of prerequisites and voluntar credits in six basic categories: sustainable sites (SS), water efficiency (WE), energy and atmosphere (EA)materials and resources (MR), indoor/environmental quality (EQ) and innovation and design (ID). Projects earn points by meeting technical requirements specific to LEED NC 2.2 (US) or LEED NC 1.0 (CAN).

Why use Concrete Masonry?

Shouldice Stone products support the principles of Green Management and by using Shouldice Concrete Masonry you will contribute to earning LEED points in the LEED credit categories. The aggregates used to produce Shouldice Stone products are manufactured from the Natural Reserves of Stone that Mother Nature created millions of years ago. These resources are processed to an aggregate that is blended with recycled reserves, cement, iron oxide colours and stabilizing ingredients to create a Stone Product that rivals the beauty of Natural Stone with a quaranteed Lifetime of Performance.

The Key Top 10 benefits realized include...

- 1. The Mass Factor for Energy Performance (EA) Credit 1
- 2. Construction Waste Management (MR) Credits 2.1 & 2.2
- 3. Recycled Content (MR) Credits 4.1 & 4.2
- 4. Local/Regional Material Use (MR) Credits 5.1 & 5.2
- 5. Durable Building (MR) Credit 8
- 6. Flexible by Design (ID) Credit 1.x
- 7. Fire Resistance (ID) Credit 1.x
- 8. Buildings with Minimal Maintenance (ID) Credit 1.x
- 9. Resource Protection (ID) Credit 1.x
- 10. Designed for Disassembly (ID) Credit 1.x

Shouldice... The Natural Choice in Stone

The Natural Resources used to produce Shouldice Stone are blended with ingredients in State of the Art Manufacturing Complexes that create Stone Products which may be used not only above grade but at grade and below grade when required. The integral quality of Shouldice Stone allows this unrestricted use, a factor that is not always available from other Manufactured

WWW.FUSIONSTONE.CA 1-800-265-3174

SHALLOW LAKE - 877-265-6696

Stone producers. Shouldice Stone is manufactured with the same composition of materials that are used in load bearing high-rise construction, bridge overpasses and every construction project demanding strength and performance. This is proof to the integral quality and value of Shouldice Stone, a product that performs and replicates Stone in every sense of the word and potentially contributes to the following sustainable LEED attributes:

The Mass Factor for Energy Performance (EA) Credit 1 (Points 1-10)

The weight of Fusion Stone provides a mass factor that absorbs the ambient air temperature and releases this stored energy throughout the day or night. This energy performance results in heating and cooling cost savings.

Waste Management (MR) Credits 2.1 & 2.2 (Points: 2)

The Manufacturing process utilizes advanced technology for absolute control during production. Capture, treatment and recycling provides minimal impact on the environment and all Shouldice Stone may be crushed and recycled during manufacture or anytime during the life of the Stone. Job-site efficiency is realized with the components of Shouldice Stone BEING modular by design for minimal jobsite treatment needs in cutting, shaping or trimming.

Recycled Content (MR) Credits 4.1 & 4.2 (Points: 2)

Shouldice Stone is manufactured with the maximum percentage of re-cycled raw materials that will not affect the quality of the Stone. There are no toxic emissions and all excess water is treated and reused.

Local/Regional Material Use (MR) Credits 5.1 & 5.2 (Points: 2)

All Natural Aggregates used are from sources and reserves located at the manufacturing complexes which are some of the most natural and pure deposits in the World. This single source of quality raw materials provides a guarantee of consistent quality wherever the Stone is used. The major North American markets for Shouldice Stone are within 500 (800km) miles by road or 1500 miles (2400km) by rail.

Durable Building (MR) Credit 8 (Points: 1)

The durability of stone combined with a system including drainage cavities and durable fasteners results in a long service life for the building envelope.

Innovative Design (ID) Credits (Points: 1-4; Max. Points in ID Category are 4)

The modular components of all Shouldice Stone products allows their use on intricate designs with the synergy of reducing additional load bearing structural capacity. Architectural Expression without comparison along with the Shouldice Stone Guarantee and a Lifetime Warranty are without equal in the industry.

Fire Resistance (ID) Credit (Points: 1)

Shouldice Stone will not burn... Period! This results in additional life safety for occupants and protection from external fire hazards.

Buildings with Minimal Maintenance (ID) Credit (Points: 1)

Shouldice Stone quality allows application without restriction and this integral quality provides a Lifetime of Performance with minimal if any maintenance required.

Resource Protection (ID) Credit (Points: 1)

The Natural ingredients of Shouldice Stone are inert (neutral) by design and have minimal impact on the environment.

Designed for Disassembly (ID) Credit (Points: 1)

Shouldice FUSION Stone is an innovative thin stone system installed with stainless steel clips and screws allowing disassembly with common power tools.

BEFORE&AFTER

CHANGE SOMETHING OLD INTO SOMETHING NEW WITH FUSION STONE

CHANGER QUELQUE CHOSE DE VIEUX EN QUELQUE CHOSE NOUVEAU AVEC FUSION STONE

AVANT&APRES

Fusion Stone products are proudly hand crafted in modern manufacturing facilities by some of the most talented craftsmen available. For additional information on beautiful and maintenance free Fusion Stone products and services please visit us at www.fusionstone.ca or call 1-800-265-3174.

Les produits de la Fusion Stone sont fièrement fabriqués à la main, dans des installations modernes, par des artisans les plus compétants et talentueux disponibles.
